Recommended Adhesive from TOLI	TOLI ECO GA Cement	(required quantity)	for steel or plastic sub-floor		40 to 60 gram/m ²	
			for mortar and wood sub-floor		60 to 100 gram/m ²	
Notes on Installation	Apply the adhesive on the whole surface of the sub-floor thinly and evenly. After drying, when the adhesive becomes translucent,install the tiles.Be careful not to put the tiles too tightly.					
Others	The stripes differ in position on a tile-by-tile basis so that they will not be exactly connected between the tiles (please refer to the room scene image).

New stain release "NANO CLEAN" is launched.
<In addition to existing stain release by fluoridation, more excellent Nano finish is put on the surface.>

All the nylon carpet tile products from TOLI have the stain release finish by fluoridation on the surface. Because of that, dirt and stains are difficult to be stuck on the surface and beautiful appearance can be kept for long. As this finish also has water and oil repellent property, spilt water and oil cannot be absorbed in the nylon surface. As long as you remove them promptly, no stain will be left.

"NANO CLEAN" is the newest stain release finish where special Nano finish is added to existing stain release by fluoridation. This new technology shows fantastic stain-resistant performance particularly to sands and soils.
