Notes on Installation	<ul style="list-style-type: none"> For one week after installation, direct sunlight, sudden change of temperature due to air conditioning, and water washing should be avoided. The color shading differs on a tile-by-tile basis, which will make the floor look very natural when the tiles are installed. 			
Recommended Maintenance Wax from TOLI	New FB Wax, U Wax, T Wax (Non-shiny & Antibacterial)			
Others	<ul style="list-style-type: none"> The dirt and stains will be more visible on the floor covering with lighter plain colors, compared to dark colors. Also they are more likely to stick with the deep-embossed surface than the flat surface. Please be aware that some rubber casters might cause color-contamination. Please bear in mind that ROYAL STONE (hexagon) may take more time for layout and installation compared to the tiles in square size. Please note that the product has the indigenous odor from its materials. When you install the tiles in hexagon size, you will have a better appearance by finishing the joints with caulking materials. Occasionally a very slight size difference could be seen between different production lots. For designed installation of 4-sides-beveled tiles, or installation of tiles with the shape of triangle, hexagon, and rhombus, please adjust the size of a tile as needed. Otherwise joints should be finished with caulking compound. Squareness of tiles are fully checked during the production. However, due to the condition of sub-floor and others, joints might not be strictly matched in some cases.
